IGBC-CERTIFIED

BEAR-RESISTANT PRODUCTS

Introduction

IGBC-Certified Bear-Resistant Products provide a way to meet requirements to secure food, garbage, and other attractants on public and private lands. These requirements apply to most National Forests, National Parks, and federal land managed by the Bureau of Land Management within grizzly bear range. They may also apply on some state lands. In addition, some municipalities, private land owners, and homeowners associations require use of IGBC-Certified Products.

The IGBC maintains two lists of Certified Products. **List A** includes products that are currently being manufactured and are available for purchase. Links provided with these products connect to the manufacturer’s homepage or other website where the product can be purchased. **List B** includes products that have been certified and can be used to comply with food and attractant storage requirements, but may no longer be available for purchase.

*Products on both lists have been certified by the IGBC as grizzly bear-resistant. This means the products meet IGBC grizzly bear-resistant design and structural standards, but it is not a guarantee that a grizzly bear cannot gain entry into these products. Nor does the IGBC guarantee that small amounts of the contents of the containers won’t be able to leak or spill out.*

*These lists of commercial products and suppliers is for information only and does not imply any endorsement of one product or source over another. Products are generally arranged in alphabetical order.*

*This official list of approved products will be updated as needed. Please note that some products may be marketed or sold under different brand names.*

Methods for Complying with Food Storage Regulations on Public Lands

In order to keep food and other attractants unavailable to bears and reduce human/bear conflicts, regulations pertaining to proper storage are likely to be present on public lands within grizzly bear habitat. Use of IGBC-Certified Bear-Resistant Products is one of the methods to comply with these food storage regulations. Other methods for food storage order compliance may also be available; for instance electric fencing is authorized in some ecosystems and under certain conditions. Regardless of your public land location or destination, we recommend contacting local land management offices for more details on the use of electric fences or other products and methods that may be used to comply with applicable food storage regulations. Food storage requirements do vary by location.
More information about using IGBC-Certified Products to meet food storage regulations on public lands in the Lower 48 States is available [here](#).

_This commercial products list and list of suppliers is for information only and does not imply any endorsement of one product or source over another. Products are generally arranged in alphabetical order._

95EG Bear Cart – IGBC Certification No. 5151  

[Due to reported field failures, this product was recently re-tested by the IGBC and several product performance issues were observed. Potential consumers should take this into consideration before making purchasing decisions. The manufacturer has been given an opportunity to correct these deficiencies and then have a re-designed product tested when product testing resumes in April 2021. This IGBC list of approved bear-resistant products will be updated at that time.] (Nov. 25)

ELECTRIC FENCES

The IGBC endorses several electric fence designs that have been field tested by the US Forest Service's Missoula Technology and Development Center. These designs are recommended by the IGBC as acceptable methods for complying with food storage orders on public lands. These designs were proven to be effective in deterring grizzlies and are therefore an option for securing bear attractants in areas frequented by grizzly bears. As additional designs are tested and proven to be effective, they will be added here.

The first design is a permanent fencing design that can be used to secure livestock, fruit trees, compost piles, chicken coops and other attractants. The second design describes components of portable electric fences that can be used when recreating in bear country and needing to secure harvested game meat, coolers, campsites. DO NOT use portable electric fences to secure food or garbage in an occupied camp site – attractants should be secured using the usual rules for camping safely in bear country. Visit [www.igbconline.org/bear-safety/](http://www.igbconline.org/bear-safety/) for information about recreating safely in grizzly country.

Several commercially-available products meet the specifications described in these approved fencing designs.

Permanent Fence Designs

The 7-strand electric fence is listed as an acceptable food storage method in the food storage order for the NCDE. This fence is not listed as an approved food storage device in the GYE. However, it can be used under special approval by the Forest Supervisor in most forests in the GYE. This fence has applicability in situations such as base outfitter camps with a permitted location on the National Forest or beehives on private land where the fence is typically in place for several days or weeks.

Missoula Technical Development Center  Ph.: (406) 329-3900

*Northern Continental Divide Electric Fence System Pub# 9923-2321 MTDC*
http://www.fs.fed.us/t-d/  (username: t-d:  password: t-d)

Portable Electric Fence Designs

The IGBC endorses the portable electric fence standards as described in the USFS’s Missoula Technology and Development Center Technical Note #0723-2305-MTDC entitled, “Specifications for portable electric fence systems as a potential alternative for food storage” as an effective method of “bear-resistant storage” in grizzly bear ecosystems. The IGBC believes this is an adequate and appropriate, temporary method of food storage.

The IGBC recommends use of the portable electric fence (as described in the Technical note) for storing food on USFS lands in the Northern Continental Divide Ecosystem (NCDE) and the Greater Yellowstone Ecosystem (GYE) with food storage orders. The IGBC encourages line officers to utilize this new method, as they deem appropriate, and to utilize it under written authorization of line officers to ensure proper use.

*This IGBC approval of portable electric fence as specified, does not alter or replace the 7-strand electric fence (MTDC Publication #9923-2321) that has been used in the NCDE since 1999.*
IGBC-APPROVED ELECTRIC FENCING PRODUCTS

Products listed below meet IGBC requirements for portable electric fences based on the requirements described in the MTDC Publication “Portable Mesh Electric Fence System Pub# 0723-2305 MTDC”. This is not imply that the products listed below are acceptable for meeting food storage orders. Please check with the appropriate land management authority for the area you will be visiting for guidance regarding acceptable methods of meeting the food storage orders in that area.

Note: this kit does not contain an energizer to power the electric fence. In order to meet IGBC specifications, an energizer meeting the specifications set forth in Pub# 0723-2305 MTDC must be used with the kit. The kit recommends using either the Stafix/Speedrite AN90 or the Patriot PB12 model energizer and both of these meet IGBC specifications.
Bear-Resistant Products Testing Program

IGBC-CERTIFIED BEAR-RESISTANT PRODUCTS THAT MIGHT NO LONGER BE AVAILABLE FOR PURCHASE – LIST B

The products listed below have been certified by the IGBC as bear-resistant but may no longer be available for purchase.

All products meet IGBC bear-resistant design and structural standards, and may still be in use by consumers.

Products that are highlighted in yellow have been discontinued as per the manufacturer.

This list of commercial products and suppliers is for information only and does not imply any endorsement of one product or source over another. Products are generally arranged in alphabetical order.
