Introduction

Interagency Grizzly Bear Committee (IGBC) Bear-Resistant Products (BRPs) provide a way to meet requirements to secure food, garbage, and other attractants on public and private lands. These BRPs have been tested by the IGBC and meet or exceed minimum IGBC standards. Interagency Grizzly Bear Committee BRPs are one method of complying with some food and garbage storage requirements on public lands. These requirements apply to most National Forests, National Parks, and federal lands managed by the Bureau of Land Management within grizzly bear range. They may also apply on some state lands. In addition, some municipalities, private land owners, and homeowners associations require use of IGBC BRPs.

The IGBC maintains three lists of Bear-Resistant Products and Designs. List A includes Products that the IGBC has confirmed are available for purchase. Links provided with these products connect to the manufacturer’s homepage or other websites where the product can be purchased. List B includes Products that have met IGBC standards but cannot be confirmed as still meeting IGBC standards or being available for purchase. List C includes electric fence designs and products that have been tested and meet IGBC standards for use in grizzly-occupied areas.

Products on both lists have met IGBC standards as grizzly bear-resistant but it is not a guarantee that a grizzly bear cannot gain entry into these products. Nor does the IGBC guarantee that small amounts of the contents of the containers won’t be able to leak or spill out.

These lists of commercial products and suppliers is for information only and does not imply any endorsement of one product or source over another. Products are generally arranged in alphabetical order.

This official list of bear-resistant products will be updated as needed. Please note that some products may be marketed or sold under different brand names.
LIST A - IGBC BEAR-RESISTANT PRODUCTS
CONFIRMED AS AVAILABLE FOR PURCHASE

BACK PACKING & SMALL STORAGE CONTAINERS

ALUBOX.COM
Metal Storage Case, Model A042 - IGBC Certification No. 5411 (approved 8-10-21)

Missoula Technical Development Center
Modifications to 50 Caliber Ammo Box: Military grade solid steel ammunition cans, with hinged lid and locking latch. Must be modified to include a bolt (with nut and washer) through the latch that prevents the latch from being opened and lid removed when bolt is in place (as shown in “Interagency Grizzly Bear Committee. 1989. Bear-Resistant Containers – Minimum design and structural standards; Inspection and testing methodology. Page 18.”). These types of ammunition cans are available in various sizes. Acceptable dimensions include: length: 10”-“19; height: 7” – 15”; width: 3” – 10 “. IGBC Certification No. 5419

Ursack (Bear Saga, LLC)
Food Storage Bag – Model: Ursack Major (Previously the S29 AllWhite) – IGBC Certification No. 3738
Food Storage Bag – Model: AllMitey – IGBC Certification No. 5135 (approved 4-24-17)
440-570-1503  www.ursack.com

Open-Head Steel Drums
Open-head, steel drums, sizes 5 to 55 gallons, with steel lids that attach to the drum head with a metal ring around the rim that is secured with a bolt and nut, or with a self-locking lever that is secured with a metal carabiner or padlock. Drums should be constructed of 12 – 20 gauge steel (i.e., steel thickness between 0.9 mm (0.035”) and 1.5 mm. (0.059”) ). IGBC Certification Number 235466 (Certified May 10, 2023)

YPSS, Inc.

All metal Recycle/Trash Bin – IGBC Certification No. 3361
LIST C - ELECTRIC FENCES

The IGBC recommends several electric fence designs that have been proven effective in deterring grizzlies and are an option for securing bear attractants in areas frequented by grizzly bears. The first design is intended for longer term applications including securing livestock, fruit trees, compost piles, chicken coops and other attractants on private lands, as well as securing outfitter camps on both public and private lands.

The second design describes components of portable electric fences that can be used when recreating in bear country to secure attractants and campsites, or whenever a temporary means of securing bear attractants is needed. Please consult with the land management authority for the area you plan to recreate in for information about specific food storage requirements in that area.

A Note About Proper Use of Electric Fences:

Common reasons for electric fence failures include failing to turn the fence on at night, improperly grounding the fence, inadequately clearing weeds, shrubs or trees shorting out fences, and failing to fully charge batteries. Protecting energizers from excessive jarring and moisture will also minimize chances of energizer malfunction (i.e. broken internal wiring or on/off switches) and the resulting electric fence failure. To ensure that fences are working properly, test the amount of voltage flowing through the fence using one of the economical and lightweight voltage testers that are now available.

Two Tech Tips bulletins from the US Forest Service’s Missoula Technology and Development Center provide an excellent overview of electric fencing and proven recommendations for setting up an effective electric fences. Relevant Tech Tips bulletins are available online by visiting the links below, or by calling the Missoula Technical Development Center at 1-406-329-3900.

Semi – or Permanent Fence Designs

The seven strand electric fence has applicability in situations such as permitted base outfitter camps, or around beehives, orchards or chicken coops on private land where the fence is typically in place for a longer period of time.

Portable Electric Fence Designs

Portable electric fences are an effective method of temporary food storage in grizzly bear country. Table 2 summarizes the minimum specifications necessary to deter grizzlies. These specifications may be updated as additional testing of portable electric fences are tested in areas frequented by grizzlies.

IGBC-CERTIFIED PORTABLE ELECTRIC FENCING PRODUCTS

Products listed in Table 3 below meet IGBC minimum requirements for portable electric fences. Fences must be built according to the specifications listed in Table 2 and must be working properly in order to meet food storage regulations in areas where portable electric fences are allowed.

This does not imply that the products listed below can be used to meet food storage regulations on all public lands. Please check with the appropriate land management authority for guidance regarding acceptable methods of meeting food storage orders in that area.

**Note:** this kit does not contain an energizer to power the electric fence. In order to meet IGBC specifications, an energizer meeting the specifications set forth in Pub# 0723-2305 MTDC must be used with the kit. The kit recommends using either the Stafix/Speedrite AN90 or the Patriot PB12 model energizer, both of which meet IGBC specifications.
